

# WIDEVIEW OCCUPATIONAL

## Perfect visual balance in the workplace

Different from progressive lenses, **WIDEVIEW OCCUPATIONAL** lenses are an ideal solution for professionals requiring intensive use of the near and intermediate vision zones. By reducing the overall distance range to cover only near and intermediate zones, the visual fields are greatly expanded covering the entire lens surface and ensuring wider optimised areas of use. In addition, the soft design promotes easy adaptation and patient comfort.

### MINIMUM FITTING DEPTH:

Deep: 18mm

Shallow: 14mm

### DISPENSING INFORMATION:

To order our **WIDEVIEW OCCUPATIONAL** lenses, please supply the distance prescription and the near pupil distance. The fitting cross is positioned onto the pupil centre.
