

# OPTISHADE

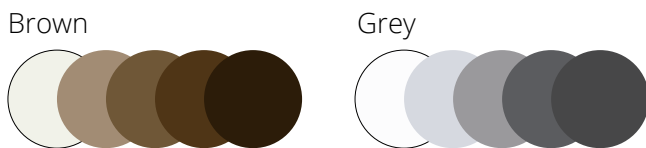

## Affordable light reactive lenses

Our Optishade lenses change from clear to dark when exposed to sunlight, offering 100% UV protection (up to 400 nm) for your eyes. Once back indoors, there is a quick fade back speed to return to clear.

OPTISHADE lenses are available in single vision, DRIVESENSE or our freeform progressives WIDEVIEW range. They can also be combined with many of our top coatings including Blue Shield, Hydro+ and Infinity XT.

### PRODUCT BENEFITS

- 100% UV protection - up to 400nm
- Available in two colours

- Lenses darken to 25% transmission in around 90 seconds
- Fade back speed of around 3 minutes when back indoors
- Light absorption a maximum of 75%
- Light transmission a maximum of 25%
- Residual colour after fade back of 10%

### IDEAL PRODUCT FOR:

- Someone looking for more affordable photochromic lenses than Transitions
- A patient who want glasses to easily adapt from inside to outside

### COMBINE PRODUCT WITH:

- Indices - 1.5 CR39, 1.6 and 1.67
- Single Vision, DRIVESENSE or Progressives
- Coatings including Infinity XT, Hydro+ and Blue Shield
