

TRANSITIONS FASHION TINTS

Pick the colour,
choose the style

Transitions Signature lenses are now available in a choice of four vibrant new fashion colours to personalise any frame and express your patient's style.

Transitions lenses change from clear to dark in the presence of ultraviolet (UV) radiation, such as when exposed to sunlight. Indoors and at night, Transitions lenses are as clear as regular clear lenses. Outdoors, when exposed to the sun's UV rays, they turn sunglass dark.

PRODUCT BENEFITS

- Protect your eyes from blue light
- 4 different colours to choose from
- Adaptive lenses to surroundings - Clear indoors and tinted when outside
- Reduces glare for more comfortable vision
- UV protection - protect eyes from UVA & UVB rays
